

Spot the phish

Click here to begin

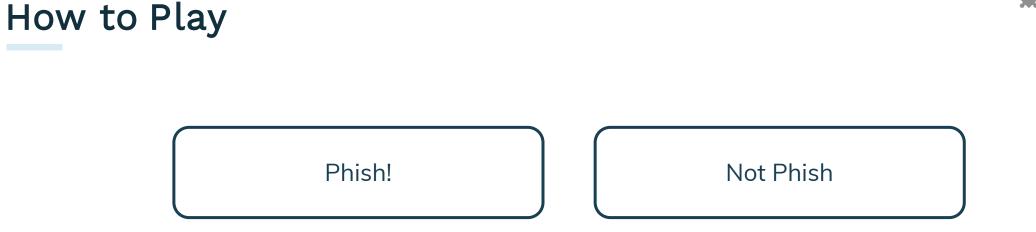

To proceed through this game, select the previous (<) or continue (>) button

Instructions

*** dynamix**

Phishing continues to be one of the top threats targeting organizations in every industry. Cybercriminals launch phishing campaigns to spread malware, steal data and money, and generally wreak havoc. Circumventing these attacks requires strong human firewalls!

You will be presented with 10 scenarios (5 mobile and 5 desktop), and it is your job to identify when you're being phished.

Tips

*** dynamix**

Remember that poor spelling or grammar typically indicate a phishing attack.

Check the sender's email domain. For the recipient's domain we use you@yourcompany.com.

Look out for unrealistic promises or threats and use common sense!
